In the Matter of Tronox Limited a corporation,

Docket No. 9377

National Industrialization Company (TASNEE) a corporation,

The National Titanium Dioxide Company Limited (Cristal) a corporation, And

Cristal USA Inc. a corporation.

# RESPONDENT TRONOX LIMITED'S MOTION FOR IN CAMERA TREATMENT OF TRIAL EXHIBITS

Tronox Limited ("Tronox"), by and through its undersigned counsel, respectfully moves pursuant to 16 C.F.R. § 3.45(b) and the scheduling order in this matter (as revised February 23, 2018) for *in camera* treatment of certain documents designated as trial exhibits by the parties to this case.

Complaint Counsel and Tronox (in conjunction with its co-respondents) have submitted their final proposed exhibit lists. Many of the documents produced by Tronox that appear on Respondents' exhibit list or Complaint Counsel's exhibit list contain confidential, competitively sensitive information. Rule 3.45(b) provides that a party may obtain *in camera* treatment for materials offered into evidence if "public disclosure will likely result in a clearly defined, serious injury." Tronox, together with its counsel, has carefully reviewed all of the Tronox-produced documents that appear on the parties' final exhibit lists. Tronox and its counsel have determined

that the public disclosure of documents listed in Exhibit B will cause a clearly defined, serious injury to Tronox. For the reasons set for forth below and in the Declaration of John Romano (Exhibit A), Tronox seeks *in camera* treatment for these confidential materials.

#### I. Legal Standard

An applicant seeking in camera treatment for material offered into evidence must demonstrate that "its public disclosure will likely result in a clearly defined, serious injury." 16 C.F.R. 3.45(b). The applicant must "make a clear showing that the information concerned is sufficiently secret and sufficiently material to their business that disclosure would result in serious competitive injury." *In re 1-800 Contacts, Inc.*, 2017 FTC LEXIS 55 (April 4, 2017) (citation omitted). This tribunal weighs six factors to determine whether the information is sufficiently secret and material to warrant *in camera* treatment:

- (1) the extent to which the information is known outside of [the] business;
- (2) the extent to which it is known by employees and others involved in [the] business;
- (3) the extent of measures taken by [it] to guard the secrecy of the information;
- (4) the value of the information to [it] and to [its] competitors;
- (5) the amount of effort or money expended by [it] in developing the information;
- (6) the ease or difficulty with which the information could be properly acquired or duplicated by others.

*In re Bristol-Myers Co.*, 90 FTC LEXIS 455, at \*5-6 (Nov. 11, 1977).

#### II. Tronox's Materials Meet the "Clearly Defined, Serious Injury Standard"

All six *Bristol-Myers* factors support Tronox's motion for in camera treatment.

First, the information at issue is particular to Tronox's business and is not known outside

#### **PUBLIC**

Tronox, with the exception of prices, which are known to customers and other parties involved in the sale process, like distributors. *See* Romano Decl. at  $\P 4$ .

Second, the information at issue is known only to a small group within Tronox. All of the information is generally shared only with those employees who must or should be aware of it in connection with their job duties, and never with more than a small fraction of Tronox's 3,500 employees. *See id*.

Third, the documents that are identified in this motion were produced confidentially under the protections of the HSR Act or the protective order in this matter. Tronox has taken due care to protect the confidentiality of the information at issue, including by establishing and adhering to policies and practices prohibiting its disclosure, and producing it only pursuant to legal assurances that it would remain confidential. *See id*.

Fourth and most significantly, Tronox's competitors and customers would benefit at Tronox's expense from gaining access to these m i n }

#### PUBLIC

information at issue because it is drawn from Tronox's confidential files and cannot be replicated by any third party. *See id.* ¶¶ 6-13.

The Commission has recognized that competitively sensitive information related to

**PUBLIC** 

discussing the category in the Romano Declaration, and the time period for which Tronox requests in camera treatment:

Type of Confidential Information	Declaration	Period
Customer-Specific Price and Volume Information	¶ 6	10 Years
Aggregated Price and Volume Information	¶ 7	5 Years
Information Regarding Price-Setting Processes	¶ 8	10 Years
Trade Secrets	¶ 9	Indefinite
Capacity, Production, and Inventory Information	¶ 10	10 Years
Business Plans	¶ 11	10 Years
Sensitive Personal Information	¶ 12	Indefinite

Exhibit B lists each document in question, the applicable bases for *in camera* treatment, and the time period for which *in camera* treatment is sought. For documents that fall into more than one confidentiality category, Tronox seeks *in camera* treatment for the longer applicable period.

#### A. Customer-Specific Price and Volume Information

The first category of documents that should be granted *in camera* treatment is the category of documents that contain individual customer price and volume information, or other sensitive customer-specific bidding and negotiations information. Tronox does not publish prices and does not publicly reveal any customer-specific information related to prices, discounts, margins, or sales volumes. Romano Decl. ¶ 6. Since Tronox negotiates individual prices with each of its customers, individualized pricing data is among the most highly sensitive information that Tronox has produced. *Id.* If this confidential pricing and volume information is disclosed, Tronox's customers

#### **PUBLIC**

could gain an unfair advantage during negotiations with Tronox, and Tronox's competitors could use it to unfairly take business from Tronox. *Id*.

Tronox strives to develop stable, long-term relationships with its customers, so prices paid by those customers relative to other customers tend to change only very gradually over time. Specific price and volume information can be used to infer relevant information about Tronox's current (and future) prices and commercial relationships. *Id.* Tronox requests that this highly sensitive information remain *in camera* for ten years. *See In the Matter of Impax Labs., Inc., A Corp., Respondent.*, 9373, 2017 WL 6033193, at \*2 (MSNET Nov. 28, 2017) (granting *in camera* treatment for ten years over documents containing "data, methods and models from the National Prescription Audit database and/or the National Sales Perspectives database").

#### **B.** Aggregated Price and Volume Information

Tronox also has produced documents that aggregate information about price and volume which do not include customer-specific information. Romano Decl. ¶ 7. The release of information about Tronox's prices and volumes for a particular customer, industry, product, or

#### **PUBLIC**

types of competitive offers. *Id.* Since Tronox's negotiation strategies have not changed significantly, even information that is years old is sensitive because it would tend to reveal Tronox's current (and future) approach to price negotiations. *Id.* Given the highly sensitive nature of these documents, Tronox requests this information remain *in camera* for ten years. *See In the Matter of Impax Labs., Inc., A Corp., Respondent.*, 9373, 2017 WL 6033193, at \*2 (MSNET Nov. 28, 2017) (granting *in camera* 

likely to increase or decrease prices, whether Tronox has the capacity to supply more TiO2 to specific customers, or whether Tronox is likely to increase capacity or production in the future.

Id. Tronox requests that this information remain in camera for ten years. See In re E.I. Dupont

detailed cost data related to titanium dioxide production).

#### F. Business Plans

Tronox produced business planning documents, including strategic plans, budgets, and other forward-looking business plans, as well as certain non-public documents related to the synergies expected from the proposed combination with Cristal. Romano Decl. ¶ 11. The public release of these materials would harm Tronox because they revea

#### **PUBLIC**

§ 3.45(b)(3).

#### IV. Conclusion

For the reasons set forth herein, Tronox respectfully moves that its motion for *in camera* treatment be granted.

ATTORNEYS FOR TRONOX LIMITED

## EXHIBIT A

#### Exhibit A

#### **Declaration of John Romano**

- 1. My name is John D. Romano. I am the Senior Vice President and Chief Commercial Officer of Tronox Limited ("Tronox").
- 2. I am responsible for supervising all of Tronox's customer-facing activities, including sales, marketing, logistics, product development, and technical service. I also have knowledge of Tronox's TiO2 feedstock and pigment production activities. I have been employed by Tronox or its predecessors since 1987.
- 3. I am familiar with Tronox's policies and procedures regarding the protection of confidential information, and I have personal knowledge of how the disclosure of various types of confidential information would harm Tronox.
- 4. In the ordinary course of business, Tronox keeps certain information strictly confidential and limits its distribution within the company to employees who must or should know it in connection with their job duties. For instance, customer-specific

#### **PUBLIC**

camera treatment because releasing them to the public would harm Tronox. Similarly, these categories cannot capture every possible type of sensitive information that should not be released to the public. I understand that Tronox's outside counsel may identify such documents and, with my guidance, identify in applicable court filings why in camera treatment is warranted for those documents.

14. This declaration draws upon the collective efforts of multiple people other than myself,
