with this gray fighting combo! The results from Go Away Gray have been amazing, with

excellent feedback regarding

## THE IDEA FOR KLEENEX

### THE IDEA FOR KLEENEX

It was a simple idea, but it was a brilliant one. In 1924, Kimberly-Clark introduced the world's first facial tissue, Kleenex. The idea was to create a soft, absorbent tissue that could be used to wipe away tears, sweat, and other fluids. The name "Kleenex" was derived from the words "Kleen" (clean) and "Ex" (exit).

The idea for Kleenex was born in a moment of inspiration. Kimberly-Clark was looking for a way to improve their facial tissue products, and they came up with the idea of using a special type of paper that was soft and absorbent.
