Re: Unsubstantiated Claims for COVID-19 Prevention or Cure

To Whom It May Concern:

This is to advise you that the FTC received and reviewed your social media website [www.facebook.com/pg/epigeneticshealingcenter/](http://www.facebook.com/pg/epigeneticshealingcenter/) where you often consumers to visit Epigenetics Healing Center. In your posts, you have made statements and to date, Epigenetics Healing Center, your website and your social media posts have not been reviewed. we have determined that you are unlawfully advertising that certain products or treatments may treat or prevent COVID-19 (COVID-19).

Some examples of unsubstantiated prevention or treatment claims on your social media website include:

- You posted an article with the title, "CORONA VIRUS UNLEASHED: WILLIAM HUANG LEARNED," along with the statements: "More research as to what you can do to protect yourself. Garlic and pycnogenol are key. Like Lisinopril and Rosartan, they can lower bp but unlike these pharmaceuticals, they also increase nitric oxide. Nitric oxide appears to be a primary body chemical to prevent getting sick with corona. Call the office at [redacted] on Monday." (From an April 2020 Facebook post)
- You posted an article with the title, "RNA Polymerase Activity of nsp12 Informs ACS-COVID-19 Virus" along with the

statement: "when you get your glutathione IV, ask us by our messaging platform if it is that can help with some of the above." From an April 1, 2020 Facebook post.

- "We are getting a lot of feedback on vitamin C requests due to its effectiveness in treating viral illnesses. More studies coming in for its effectiveness for COVID-19. Wuhan has not been shut down here. From a March 25, 2020 Facebook post.
- "Dr. Enqiang Mao, chief of infectious disease medicine at the University of Illinois at Chicago, stated that his group treated ~50 moderate to severe cases of COVID-19 infection with high-dose intravenous vitamin C."

"The IVC dosing was 10-15 g/day, with 1,000 mg for moderate cases and 2,000 mg for more severe cases."

"All patients who received intravenous vitamin C improved, and there was no mortality."

"There were no side effects reported by any of the cases treated in the above IVC."

(From a March 16, 2020 Facebook post.)

- "IV vitamin C in high doses can be very effective for COVID-19. Get yours at the Epigenetics Healing Center asap. (From a March 17, 2020 Facebook post.)"
- "Coronavirus? It is something that should be avoided and typically only serious for the elderly and immunocompromised. Vitamin C in high doses can mitigate any issues with it." (From a March 31, 2020 Facebook post.)

It is unlawful under the FTC Act, 15 U.S.C. § 41 *et seq.*, for an advertiser, manufacturer, or service provider, to claim or cause to be published any advertisement or other communication that is false or misleading in any material respect, including, when appropriate, with respect to human health, studies, substantiating that the claims are true at the time they are made. For COVID-19, no such study is currently known to exist for the prevention, treatment, or cure of any disease, and any coronavirus-related prevention or treatment claims regarding any products and services are not supported by competent and reliable scientific evidence. You must immediately cease making all such claims.

You are also advised to review all other claims for your products and services and immediately cease making claims that are not supported by competent and reliable scientific evidence.
